

OUR SUSTAINABILITY COMMITMENTS

Our company is committed to sustainable development, capable of meeting today's needs without compromising the resources and the ability of future generations.

Respect for the Environment and our Social Responsibility are the fundamentals to fulfil these commitments.

We have an Environmental Management System (EMS) complying with the International Standard UNE-EN-ISO 14001:2015.

The principles that govern our Sustainability commitments are:

- Compliance with applicable environmental Legislation and other environmental requirements to which the company subscribes.
- Identification and evaluation of the environmental aspects derived from our activities for the constant improvement and the protection of the environment included the prevention of the pollution.
- Extending the commitment to our organization and especially ensuring our employees are training, communication and participation in the system.
- Sustainable use of natural resources, particularly by encouraging energy conservation and the use of clean technologies.
- Set goals and targets for the elimination or reduction of waste emissions or discharges and recycling of materials.
- To promote good environmental practice in business activities, such as minimization and waste recycling and properly managing these activities.
- To promote accountability at all levels of the company to fulfil the commitment made by Nordotel on the Environment.

For this, we need the cooperation of Staff, Customers, Suppliers and Authorities.

Sustainable development is only possible if we are all aware of our share of responsibility.

ANTONIO GARCÍA
